USER INTERFACE INTUITIVEMESS	INTEGRATION OPTIONS	FEATURES	POTENTIAL FOR SCALABILITY	TEMPLATE & ASSET LIBRARY	EXTENT OF CUSTOMER SUPPORT	USERBASE & REVIEWS	PRICING
Does the platform support new users with tutorials, feature tips, or walkthrough wizards during onboarding? Can users navigate the platform without hassle? Is the platform responsive to users' actions in terms of the speed and accuracy of desired outcomes? How forgiving is the tool in terms of reversing mistakes?	Can the tool integrate with your existing tech stack? Does it have an open API? How compatible is it with third-party tools like Zapier?	What type of assets can the creative automation tool create? What personalization options are there? What automation capabilities does it offer? How does the platform manage collaboration? What role do analytics and data reports play? Does the platform let you embed branded elements easily?	Can the tool handle multiple tasks or users simultaneously in a high-usage scenario? How effectively does the platform perform during complex tasks like batch rendering or large-scale customizations? Can the database scale as designs, updates, and records increase? Can the tool handle retrieving, updating, and organizing designs as its database grows? Does the platform support role-based permissions?	Are there industry-specific templates available? How customizable are templates? How diverse are the templates? How regularly is the library updated? Is there asset variety?	What are the typical response times? Which channels is support available on? What onboarding and setup support can you expect? Are there self-help resources available?	What type of businesses—B2B, B2C, or hybrid—go for which creative automation tool? Which industries gravitate to which creative automation tool? What sized companies resort to which creative automation tool? Where are the businesses that use these creative automation tools located? What are users saying about the platform?	What would the total cost be given the number of users and specific feature requirements of your business? Are pricing plans customizable? Is pricing scalable?
